

What is needed to make Healing Forward a success?

Would honor the tragedies to bring initiatives and supports
A lot of retired professionals who can't pay for rent and time would want to get back to their community to be in their legacy who would want to be a mentors
Two firemen who would want to be mentors to students in the Peekskill schools
Lost connection because wasn't on track
File call for volunteer that includes "not having done child abuse" through embedding process
Fill out the application and talk about a little bit of who you are

Losing track to the connections of wanting to be mentors
Take the file from the paper and making it digitized
Don't want to connect with mentors right away until parents give approval
Post it notes and business cards turns off people who will end up losing connections
Mentorships that can help networking for jobs
Graduates or individuals to connect with students to help the community to seek hope and contribute
We need to move beyond paper and make it digital platform
Pre College students have potential to have college credit for their work experience
Benefits to gain recognition to have lots of opportunities
Mentorships was the most promise for the goal of Healing Forward as a part of their pillars

Once the connection starts, would that bring more involvement to the city of Peekskill?

Work as a partner with the Youth Bureau
Having a safe space for being mentored
Background checks
In the end we want something on the Peekskill Website
